TO AHEAD/GBF

I am happy that I am member of such big association that dedicated itself in field of education. It's good to have such association in our country where most of the students are financially handicapped and even some time fail to make their goal due to this problem. AHEAD is not only providing financial help but also emotional and material support which is much great to students who live away from their families and unable to obtain all this material and emotional supports from their family.

I am sure that AHEAD has made change in my life. The monthly allowance may be insufficient in relation to the current status economic status in the country but the emotional and psychological satisfaction is more than the allowance. so it mean great for me, and I do need that the fellowship allowance is renewed. I badly need the renewal of the fellowship. so that I can make my goals. I would also like to say thank you for all founders and facilitators of the GBF/AHEAD who dedicated their time and material for our sake.

with greeting

Thank you -
JHJ
